EDUCATION

University of Colorado Boulder

Master of Science in Computer Science; GPA: 3.8/4.0 | Expected Graduation: May 2027

Boulder, CO

Aug. 2025 – Present

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Engineering; GPA: 8.6/10.0

Mumbai, India

Jan. 2020 – May 2024

EXPERIENCE

Software Engineer Intern

Visa USA Inc.

May 2026 – Aug 2026

Highlands Ranch, CO

- Architected **VisionX**, a log-triage platform ingesting logs via **Drain3** templating, embedding-based **ML classification**, and **LLM escalation**, then grouping failures into ranked issues with **HDBSCAN/UMAP** clustering.
- Built an autonomous **remediation agent** (**LangGraph** ReAct via GitHub Copilot SDK) that clones the source repo, diagnoses root cause, and ships fixes as **GitHub PRs** and **Jira** comments through an internal MCP Hub.
- Designed a forward-looking **risk engine** scoring per-source outage risk from seasonal baselines, trend, and novelty, plus a self-managing classifier **registry** with automated drift detection and guarded retraining.
- Engineered the backend on **FastAPI** with **Kafka**-driven workers, **Postgres**, and **Redis/SQLite** caching, and delivered the architecture and live demo in a **VP-level** leadership presentation.
- Prototyped an **agentic e-commerce Flutter** app: a **GenAI** agent cross-shops marketplaces to book the best match, a **blockchain** escrow releases payment on confirmed completion, and GenAI auto-drafts vendor profiles.

Software Developer Intern

Aim4U Software Solutions Private Limited

Nov. 2023 – Dec. 2024

Mumbai, India

- Architected **Dermalens**, an AI-powered healthcare platform connecting patients with verified dermatologists, using **Flutter**, **AWS Lambda** & **Detectron2** for skin disease classification at **90-95% accuracy**; **300+ downloads**
- Led **Agora SDK** integration for HIPAA-compliant video consultations, enabling end-to-end telemedicine workflow.
- Co-developed **Autobuddys**, a Flutter app with mini-games helping autistic children focus, **250+ downloads**.

Research and Software Intern

Acuradyne Systems Private Limited, IIT Bombay Research Park

Jan. 2023 – June 2023

Mumbai, India

- Engineered IoT pulse-monitoring device for aging assessment, achieving **566%** faster **BLE/ESP32** transfer.
- Developed **Flutter** patient management app with real-time pulse visualization and automated clinical reporting.
- Designed secure communication architecture using **AES128** encryption and 4-pin authentication.

PROJECTS

Echo - Chat App | Go, Kotlin, PostgreSQL, Redis, Kafka, Docker | [GitHub](#) | [Postman](#)

Sept 2025 – Present

- Built a full-stack chat app with **Kotlin Jetpack Compose** frontend and **Go microservices** backend.
- Architected a **9-service backend** with **PostgreSQL**, **Redis caching**, and **Kafka event streaming**.
- Implemented real-time **WebSocket messaging** supporting 10K+ concurrent connections with **sub-10ms latency**.
- Developed Android UI with **Compose**, featuring **offline-first sync**, **push notifications**, and multi-device support.

Sync | Go, Kotlin, MongoDB, Redis, PostgreSQL | [Backend](#) | [Mobile](#) | [Postman](#)

Jan 2025 – June 2025

- Built a full-stack **Reddit-like social platform** with **Kotlin Jetpack Compose** app and **Go REST API** backend.
- Engineered 40+ RESTful APIs with **JWT auth**, **Google OAuth**, Redis caching, rate limiting, and session handling.
- Designed **Jetpack Compose UI** with **real-time feeds**, threaded comments, voting, and Cloudinary media uploads.
- Integrated **MongoDB**, **PostgreSQL**, and **Redis** to build a scalable **multi-database backend architecture**.

Nesters | Flutter, Supabase, Firebase, Google Cloud Platform, Python | [Playstore](#) | [Appstore](#)

May 2024 – Jan. 2025

- Built **Flutter app** connecting students with roommates using **advanced matching filters** and preferences
- Implemented **real-time Firebase chat system** with push notifications supporting **50,000 concurrent users**
- Created **marketplace** for students to buy, sell, rent items with structured **Supabase database**

JetScan | Android, OpenCV, Firebase, Google Cloud Platform | [Github](#) | [Demo](#)

May 2024 – Nov. 2024

- Built an **Android document scanner** using **Jetpack Compose** with **MVVM architecture** and modular design
- Developed **edge detection algorithm** achieving **100ms document recognition** with **angle-invariant** accuracy
- Integrated **Google Document AI OCR** for accurate text extraction from diverse document types and formats

TECHNICAL SKILLS

Languages: Kotlin, Python, Go, Java, Dart, Swift, C/C++, C#, JavaScript/TypeScript, SQL, Bash, HTML/CSS.

Backend & APIs: FastAPI, MCP, Kafka, gRPC, WebSocket, JWT/OAuth2, Node.js, Express, Vector.dev

AI/ML: PyTorch, LangChain/LangGraph, scikit-learn, NumPy, Drain3, HDBSCAN/UMAP, YOLOv8/OpenCV.

Databases & Caching: PostgreSQL, Redis, MongoDB, Neo4j, MySQL, SQLite, pgvector, Firebase, Supabase.

Mobile & Frontend: Jetpack Compose, Hilt, Flutter, SwiftUI, React, Vite, Tailwind CSS, Retrofit/OkHttp.

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Docker, Kubernetes, CI/CD, Prometheus, Grafana, Git.

Developer Tools: Android Studio, VS Code, Xcode, Postman, Figma, JetBrains IDEs, Claude Code.
