EXPERIENCE

Software Developer Intern

Nov. 2023 – Dec. 2024

Aim4U Software Solutions Private Limited

Mumbai, India

- Architected **Dermalens**, an AI-powered healthcare platform connecting patients with verified dermatologists, using **Flutter**, **AWS Lambda** & **Detectron2** for skin disease classification at **90-95% accuracy**; **300+ downloads**
- Led technical integration of **Agora SDK** for HIPAA-compliant real-time video consultations, enabling end-to-end telemedicine workflow from diagnosis to digital prescription management
- Pioneered **rigorous testing protocols** maintaining high code coverage while mentoring junior interns on collaborative development practices and software quality assurance
- Co-developed **Autobuddys**, a socially impactful Flutter application with interactive mini-games designed to help autistic children maintain focus, reaching **250+ downloads** with built-in performance analytics

Research and Software Intern

Jan. 2023 – June 2023

Acuradyne Systems Private Limited, IIT Bombay Research Park

Mumbai, India

- Engineered IoT health monitoring device for aging assessment through radial pulse analysis, achieving **566% improvement** in data transfer rates by implementing **BLE protocol** with ESP32 microcontroller
- Developed comprehensive **Flutter mobile patient management system** featuring real-time pulse data visualization, secure data collection, and automated report generation for medical professionals
- Designed secure communication architecture implementing **AES128 encryption** and 4-pin authentication, ensuring data protection for sensitive medical information
- Innovated **Over-The-Air (OTA) firmware update mechanism** replacing manual USB updates, reducing production deployment time by **40%** and enabling seamless device maintenance via mobile connectivity

PROJECTS

Echo - Chat App | Go, Kotlin, PostgreSQL, Redis, Kafka, Docker | [GitHub](#) | [Postman](#)

Sept 2025 – Present

- Built a full-stack chat app with **Kotlin Jetpack Compose** frontend and **Go microservices** backend.
- Architected a **9-service backend** with **PostgreSQL**, **Redis caching**, and **Kafka event streaming**.
- Implemented real-time **WebSocket messaging** supporting 10K+ concurrent connections with **sub-10ms latency**.
- Developed Android UI with **Compose**, featuring **offline-first sync**, **push notifications**, and multi-device support.
- Designed **JWT authentication** flow, typing indicators, read receipts, and message delivery tracking for enhanced UX.

Sync | Go, Kotlin, MongoDB, Redis, PostgreSQL | [Backend](#) | [Mobile](#) | [Postman](#)

Jan 2025 – June 2025

- Built a full-stack **Reddit-like social platform** with **Kotlin Jetpack Compose** app and **Go REST API** backend.
- Engineered 40+ RESTful APIs with **JWT auth**, **Google OAuth**, Redis caching, rate limiting, and session handling.
- Designed **Jetpack Compose UI** with **real-time feeds**, threaded comments, voting, and Cloudinary media uploads.
- Integrated **MongoDB**, **PostgreSQL**, and **Redis** to build a scalable **multi-database backend architecture**.

Nesters | Flutter, Supabase, Firebase, Google Cloud Platform, Python | [Playstore](#) | [Appstore](#)

May 2024 – Jan. 2025

- Built **Flutter app** connecting students with roommates using **advanced matching filters** and preferences
- Implemented **real-time Firebase chat system** with push notifications supporting **50,000 concurrent users**
- Designed accommodation search with **multi-parameter filtering** for price, location, and amenities
- Created **marketplace** for students to buy, sell, rent items with structured **Supabase database**

JetScan | Android, OpenCV, Firebase, Google Cloud Platform | [Github](#) | [Demo](#)

May 2024 – Nov. 2024

- Built an **Android document scanner** using **Jetpack Compose** with **MVVM architecture** and modular design
- Developed **edge detection algorithm** achieving **100ms document recognition** with **angle-invariant** accuracy
- Integrated **Google Document AI OCR** for accurate text extraction from diverse document types and formats
- Deployed scalable **Flask PDF server** on **Google Cloud Run** supporting split, merge, and encryption operations

EDUCATION

University of Colorado Boulder

United States

Master of Science in Computer Science, Aug. 2025 – Present

GPA: 3.96

Sardar Patel Institute of Technology

India

Bachelor of Technology in Computer Engineering

GPA: 8.6/10.0

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart, Go, Python, C, C++, JavaScript, HTML, CSS, C#, Assembly, SQL.

Databases: PostgreSQL, Redis, Mongo, MySQL.

Tools/Frameworks: Jetpack Compose, Flutter, Android, Flask, Django, Node.js, Express, TensorFlow Lite.

Additional Skills: Firebase, Google Cloud Platform, AWS (EC2, S3, Lambda), CI/CD, Git, Figma, Docker.
